

Discrete Mathematics
Volume 238, Numbers 1–3, 28 July 2001

Contents

Preface

<i>C.J. Colbourn and H. Shen</i>	1
----------------------------------	---

Contributions

<i>A.M. Assaf, N. Shalaby and J. Yin</i> Directed packing and covering designs with block size four	3
<i>M. Buratti and F. Zuanni</i> Some observations on three classical BIBD constructions	19
<i>W. Chen and T. Kløve</i> Weight hierarchies of binary linear codes of dimension 4	27
<i>J. Eisfeld, L. Storme, T. Szőnyi and P. Sziklai</i> Covers and blocking sets of classical generalized quadrangles	35
<i>S. Gao and H. You</i> Vanishing conditions on parameters for $P(Q)$ -polynomial association schemes	53
<i>D. Held and M.-O. Pavčević</i> Some new Hadamard designs with 79 points admitting automorphisms of order 13 and 19	61
<i>T. Hellese, C. Rong and K. Yang</i> On t -designs from codes over \mathbb{Z}_4	67
<i>T. Kløve</i> Relations between the covering and Newton radii of binary codes	81
<i>J. Lei, Q. Kang and Y. Chang</i> The spectrum for large set of disjoint incomplete Latin squares	89
<i>T. Maruta</i> The nonexistence of some quaternary linear codes of dimension 5	99
<i>A. Pasini</i> Four-dimensional football, fullerenes and diagram geometry	115
<i>A.R. Prince</i> Covering sets of spreads in $PG(3, q)$	131

<i>A. Pasini</i> Four-dimensional football, fullerenes and diagram geometry	115
<i>A.R. Prince</i> Covering sets of spreads in $PG(3, q)$	131

<i>D. Wu and L. Zhu</i> Bounds and constructions for TWOOAs	137
<i>S. Zhang and S. Li</i> Some new extremal self-dual codes with lengths 42, 44, 52, and 58	147
<i>Y. Zhang, S. Pang and Y. Wang</i> Orthogonal arrays obtained by generalized Hadamard product	151
<i>Z. Zhang, X. Ma and Y. Yang</i> A unified method to construct neural network decoders for arbitrary codes and decoding rules	171
<i>L. Zhu and H. Zhang</i> A few more r -orthogonal latin squares	183
Author index to volume 238	193
